

Specialist medicines management support from
our expert clinical pharmacist team

The UK's largest clinical pharmacist team

We have a team of over 45 visiting clinical pharmacists, who develop close working relationships with clinical teams around the UK and are available to give authoritative advice on treatments, best practice and regulatory requirements.

We train, support and mentor our pharmacists so they can always provide the highest quality service, informed by the latest clinical evidence.

Pharmacist on-call
until 10pm

pharmacy

Clinical advice and
guidance

We train, support and mentor our pharmacists to ensure they always offer the highest quality service

Our pharmacists offer advice on medication, including action and uses, storage, administration and recording. They can also participate in your advisory committees or medicines management or clinical governance meetings.

Medication review

Maintaining best practice and professional standards in medicines management is crucial to the delivery of high quality patient care. We ensure our clients are using medicines management policies and procedures that meet these standards and are in line with regulatory requirements.

Our pharmacists will carry out clinical reviews of prescription charts on each visit to ensure they are legal, appropriate and free from risk of drug interaction.

Compliance services

Helping to maintain and develop the reputations of our partners is a key goal for Ashtons. In addition to ongoing compliance advice by a visiting pharmacist, we always have a Specialist Pharmacist either at your site or monitoring the process remotely during regulatory inspections.

Our processes, software solutions, and documentation systems install robust medication audit trails within each facility we work with, providing clear evidence for inspectors of how medication is stored, administered and disposed.

Robust audit trails

Helping you provide clear evidence of medication storage, administration and disposal in your facility.

Clinical Guidelines

We offer comprehensive assistance to help you easily access updates and guidelines that are most relevant to you.

Mock inspection service

An additional service to help ensure regulatory standards are being met on a day-to-day basis.
