e-Works

ashtons

A unique electronic prescription and medicines administration (EPMA) system
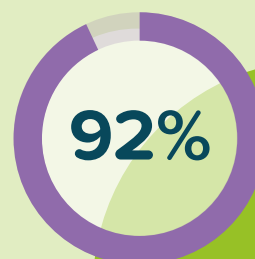

HTN
HTN NOW AWARDS 2022
WINNER

Core features

- Full audit trail of prescribing and administration records
- Facilitates a flexible approach to prescribing
- Remote access, 24/7, anywhere with internet access
- Prescribing dates and times automatically generated
- Clinical decision support system
- Medicines administration scheduler
- Clearly displayed medication due status
- Reasons for non-administration easily recorded
- Integrated pharmacy review tools
- Extensive reporting tools

A simple, affordable alternative...

Ashtons e-Works is designed for a wide range of healthcare providers, including hospitals, hospices and care homes, as an affordable, easy-to-use alternative to the high-cost and unnecessarily complex prescribing and administration systems intended for use by NHS Trusts.

This system replaces the paper medication records used in inpatient settings, such as prescription charts, and is transformational in improving the safe prescribing and administration of medication. It will also ensure faster access to medication, reduce duplications of patient records and help to free up staff time.

For patients

- All features deliver a reduction in medication errors, helping patients to receive the right medication at the right time

- This helps increase patient safety, the quality of treatment provided and, in turn, leads to better healthcare outcomes

For doctors

- Remote access for prescribing, 24/7, will help doctors to work more efficiently and reduce unnecessary site visits

- Clinical decision support, plus better access to clinical information and flexible prescribing options, helps enhance the accuracy and effectiveness of prescribing

For nurses

- Transforms the way nurses manage medicines administration, making it simple to identify patients who are due medication and easy to record details

- Removes the need for nurses to manually search prescription charts

For managers

- Significant improvements in managerial oversight and extensive reporting tools

- Helps staff work more efficiently and reduces paper usage, with few training requirements due to the system's simple, intuitive workflow

For regulators

- Full audit trail of prescribing and administration records supports regulatory compliance

- All features and benefits combined lead to overall improvements in quality, safety and compliance
